

Dear FCC Members, I wish to express my opposition to the BPL plan that is currently being considered. I feel that this will endanger the existence of Amateur Radio operation throughout the country by creating interference and unbearable noise levels on the amateur radio frequencies. The levels of noise that I've heard are incredible and will make our operating frequencies unusable. This should be stopped before it goes any farther for consideration. Thank you for your time and consideration to this problem.

Sincerely,

Charles Chirhart K0SV
